## **DETAILED ACTION**

### **Response to Amendment**

1. The amendment filed on 01/28/10 has been made of record and entered. Claims 1-46 were previously canceled. Claims 47-51, 54-56, 59-63, 74, 81, 88, & 91 have been amended.

Claims 47-94 are currently pending in this application.

### **Status of Withdrawn Claim(s)**

2. This application contains claims 81-94 are drawn to an invention nonelected with traverse in the reply filed on 07/22/09. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

### **Double Patenting**

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Art Unit: 1793

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

**Claims 47-80** are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over **claims 1-35 of copending Application No. US 2006/0178265 A1 (or Appl. Serial No. 11/340,542)**. Although the conflicting claims are not identical, they are not patentably distinct from each other because of the following reasons.

The substantive difference between the instant claims and the disclosed claims, is that the disclosed claims further recite the limitation “the needle-shaped ceramic particles compose of a tip having a spherical shape and a body portion that supports the tip, and the diameter of the tip having a spherical shape is larger than the diameter of the body portion”, which the instant claims do not recite.

It is inherent and expected that the claimed ceramic body would have the same characteristics as in the disclosed ceramic body because both the instant claims and the disclosed claims recite the same ceramic body, wherein at least a portion of the ceramic particles contains at least Si, Al, and Mg and has needle-shaped crystal structure. In other words, the needle-shaped crystal structure of the claimed ceramic body would inherently have “the needle-shaped ceramic particles compose of a tip having a spherical shape and a body portion that supports the tip, and the diameter of the tip having a spherical shape is larger than the diameter of the body portion” as recited in the disclosed claim 1.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

**Response to Applicants' Arguments**

4. The remarks filed on 01/28/10 have been fully considered, but not deemed persuasive in view of the following reason(s).

Applicants' arguments regarding the Suzawa '563 reference is found persuasive and thus the rejection made under Suzawa '563 has been removed from the office action. However, the office action is made final because applicants have not yet filed a terminal disclaimer (T.D.) to overcome the obviousness double patenting rejection made in the last office action (see above).

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

**Conclusion**

6. Claims 47-94 are pending. Claims 47-80 are rejected. Claims 81-94 are withdrawn due to nonelected (distinct) invention(s). No claims are allowed.
